Warnings for Safe Use

- This product is intended for Domestic Use only.
- Please read the instructions and warnings carefully before installing the product and ensure this document is kept with the product for future reference to ensure product longevity and in the interest of safety.
- If you give the product to another person, please give them this manual as well.
- If any modification is made it will invalidate the warranty and may render the product unsafe.
- This product is IP44 rated and suitable for installation in Zones 2 and Outside Zones according to the IEEE regulations.
- It is not suitable for use in saunas, steam rooms and shower cubicles.
- Appropriate circuit protection should be available for the product.
- When drilling use appropriate eye protection.
- The use of a Residual Current Device (RCD) is advised for any power tools used during the installation of this product.
- Take suitable precautions when handling glass.
- Beware of hidden cables or pipes. Take care if drilling on tiled surfaces in case the drill slips.
- Always switch off the electrical supply to the product at the mains during installation and maintenance.
- It is recommended that this product is installed by a person who is able to meet the level of competence required in order to comply with relevant regulations. If in doubt consult a qualified tradesperson.
- Do not enter IP44 box unless competent and item is isolated from mains.
- Do not use if glass is broken or unsafe.
- Do not use if any electrical wires appear damaged or degraded.
- Do not overload shelves or unit.
- This product is designed for installation into a brick or masonry block wall, if mounting onto other substrate ensure appropriate fixing and batons (if required) are used and the load bearing of the wall is sufficient.
- It is recommended that this product is installed by two people.
- Dispose of packaging in accordance to local authority regulations.
- At end of life dispose of item according to local authority regulation.

Electrical Safety Information

hib. recommends that all electrical bathroom products must be installed in accordance with current building and wiring regulations. If in doubt please contact an electrician.

Before drilling ensure that there are no hidden cables or pipes in the wall.

Electrical Zoning Information & Diagram

This product contains a light source of energy efficiency: **Class E**
This product is IP44 rated and suitable for installation in **Zone 2** and **Outside Zone**

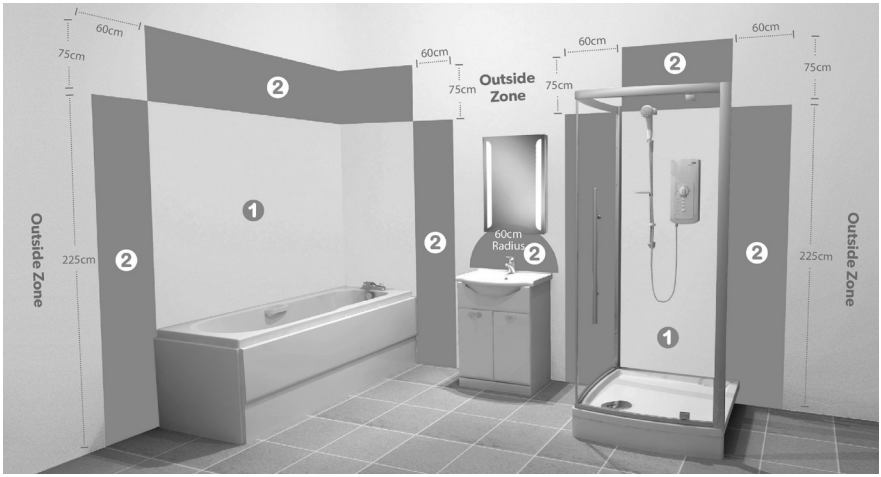

Fig 1 *Zonal Diagram*

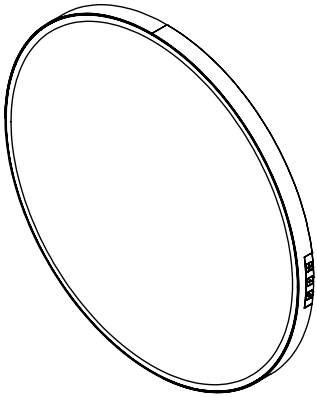

All installations must comply with guidelines which are based on a zonal concept and must be followed to ensure the safe installation of electrical appliances in the bathroom. These regulations apply to domestic installations only. Installations must be made in accordance with the current IEE wiring regulations and relevant building regulations.

Caution!

We recommend that you place this mirror on a soft flat surface to ensure no breakages.

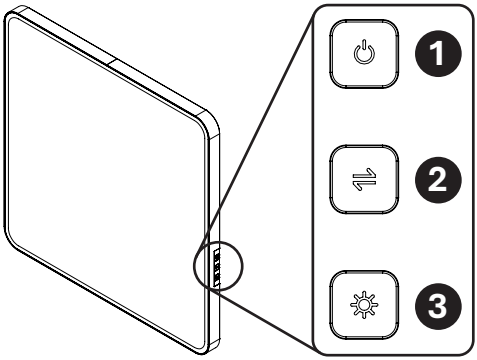

Tools & Equipment Needed

What's in the Box
- Vale Mirror
- Fittings Pack

Tools Not Provided
- Screwdriver
- Spirit Level
- Pencil
- Drillbit
- Drill

Operations

Illumination ON/OFF

Gently tap top button (**1**), located on the right side of the mirror to turn the illumination ON. Repeat this action to turn the illumination OFF.

Changing the Colour Temperature & Brightness of the Illumination

To control these functions, use the buttons located on the right side of the mirror. Gently tap or touch & hold the middle button (**2**) to cycle through colour temperature. Gently tap or touch & hold the bottom button (**3**) to cycle through illumination brightness.

Heated Pad

The heated pad is only on when the mirror is illuminated.

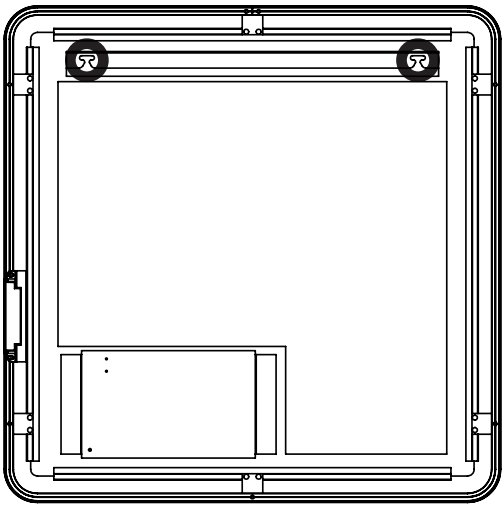

Mirror Installation Instructions

We recommended that this product is installed by two people.

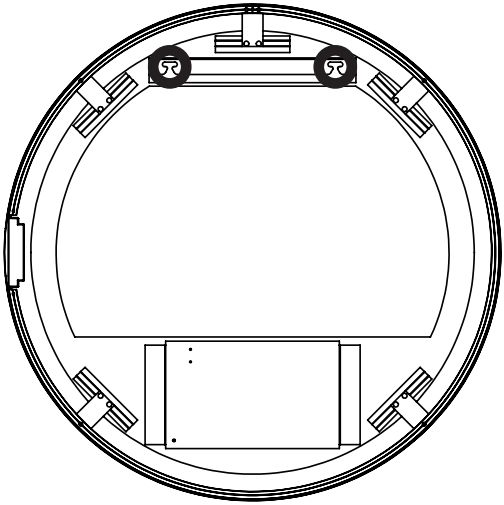

1. Position the mirror in a suitable location according to the zonal diagram - ***Fig. 1***, ensuring that the domestic electrical mains supply is within reach of the cable connection point of the product.
2. Carefully mark the position of the mirror using a soft pencil ensuring it is level. Remove the mirror and mark the mounting points, see opposite. **Please ensure that all marked mounting points accurately match up with the fixing points on the mirror.**
3. Using a suitable drill bit, drill holes in the marked positions to a suitable depth. If drilling through tile, use a suitable drill bit.
4. Insert wall plugs level with the surface of the wall. If fitting to a tiled surface, wall plugs should be inserted below the tile surface to avoid cracking. **NB. For plasterboard walls, specialist fixings should be purchased, available from any DIY or hardware store.**
5. Screw supplied fixings into wall plugs.
6. Ensure the domestic electrical mains supply to which the mirror is being connected is turned off. Connect the domestic mains supply to the terminal box according to the wiring diagram, see ***Fig.2***.
7. Hang the mirror in position.
8. Switch the domestic electrical mains supply for the mirror back on.
